

INTENSE R4.00

GROW ROOM BUILT FOR LARGE GROWING SPACE

INT480

INT600

INT480K

INT600K

The Intense grow tent is designed for plants measuring 50 to 150cm (20 to 60in) tall, with grow spaces of 11.50 to 21.50m² (125 to 230ft²). It has a 60cm (25in)-wide central corridor so you can access the plants from inside and outside, and features 1 or 2 grow spaces on both sides of the corridor, depending on the chosen configuration (accessibility or robustness). You can also choose not to use the corridor and use the entire area as a grow space, with the SPACE BOOSTER & WEBIT that are sold separately. The Intense grow tent features DUCTING FLANGES (DF25 & DFM315), for managing intake/exhaust and comes with everything you need to install the complete system.
